

OVERVIEW

CIBER, Inc

Practical Innovation

Practical innovation is not a new concept for CIBER. We have been using innovative ideas and technology to help our clients improve their businesses since 1974. CIBER experts take the practical—the sensible, the functional, the proven—and we leverage the latest technologies to enhance your systems and processes. Combining the practical with the innovative is a unique and valuable proposition that communicates how we do business.

CIBER helps clients use information technology (IT) to solve business challenges. We are vendor-agnostic, so our only interest is in providing our clients with the best IT solutions for their business needs—regardless of the technology, product, or vendor.

About CIBER:

- Founded in 1974
- 70 offices in 18 countries
- 14 Global Solution Centers
- 8,000 employees
- Exceeding \$1 billion in annual revenue
- Publicly traded: NYSE: CBR

CIBER: Driving Results Through Innovation

For more than 35 years, CIBER has helped executives at Fortune 500 and mid-sized companies, as well as local, state, and federal government entities in the U.S., determine how information technology (IT) solutions can solve significant business challenges. CIBER and its team of 8,000 employees in more than 70 offices worldwide help clients in numerous industries design, build, integrate, and support IT solutions that provide compelling business results.

CIBER also helps clients before the technology is discussed. We can help you quantify the value of IT projects, articulate the business consequences of changing, de-emphasizing, or canceling IT projects, even transform the perception of IT from that of a technology provider to that of a trusted technology and business advisor.

Whether you seek a custom solution, a packaged solution, or outsourcing services, CIBER can deliver the results you're looking for. We see what can be done to optimize and streamline what you already have; then we infuse innovative, new ideas and technologies where needed, recommending just the right solutions to bring better, faster results for your success. That's practical innovation. That's CIBER.

Strategic Consulting Services

CIBER's innovative Global Technology Practices, with our best-of-breed tools, standardized processes, and skilled resources, enable us to provide a consolidated, end-to-end focus for your enterprise. Whatever your objectives, CIBER has the knowledge and expertise to deliver throughout the project lifecycle.

- **Business Consulting Practices** include Strategy and BPM, Supply Chain, CRM and ERP.
- **Integration Consulting Practices** include BIDW, EA, EAI, Enterprise Testing, Collaboration and Mobility
- **Application Consulting Practices** include Java and Open Source, Microsoft and Legacy Modernization
- **Infrastructure Consulting Practices** include Cloud Computing and XaaS, and Virtualization
- **Innovation Practices** include Emerging Technologies, R&D Labs, KMO and Social Networking Technologies

Packaged Enterprise Solutions

With more than 20 years as a leading enterprise software consulting provider, CIBER has helped clients worldwide and in numerous industries manage change. CIBER's software-agnostic stance means we focus on providing clients with the best solution for their needs without regard to vendors or products.

Yet CIBER also maintains strong partnerships with leading enterprise resource planning (ERP) solution providers—SAP, Oracle (incl. JD Edwards and PeopleSoft), Lawson, and many supply chain vendors—so we stay on top of product offerings and work closely with our partners to provide the right resources and solutions that ensure our clients' success.

Outsourcing Solutions and Managed Services

CIBER manages, maintains and enhances applications and infrastructure through our IT operations (ITO) facilities. Our ITO solutions can help your organization reduce costs, accelerate time-to-market, simplify IT management, expand resources, enhance efficiency, and enable you to reallocate resources to highest value opportunities. CIBER provides the right mix of outsourced, managed, and project services to deliver the greatest business value. Solutions include data center operations, help desk, desk side support; and networks, systems and applications monitoring. Our ITO facilities can host your applications—including enterprise applications, such as SAP, Oracle, and Lawson.

U.S. Government Practices

CIBER's State & Local Government Practice has more than 25 years of experience helping all 50 states and numerous local entities achieve their goals. Our in-depth understanding of government processes and regulations and our extensive expertise in a variety of technology solutions has delivered high-quality, cost-effective solutions for customers in Health and Human Services, Law and Justice, Transportation and Labor Management.

CIBER's Federal Government Practice delivers services and solutions that

improve productivity, streamline services, and reduce costs. Whether the client is a civilian, defense, or intelligence agency, CIBER focuses on effective collaboration and measurable results.

Choose CIBER For Expertise

CIBER's technical expertise, business acumen, industry knowledge, and exemplary customer service are acknowledged by clients and industry experts.
