CIBER WINS \$13.1 MILLION ARMY HOSPITAL IT PROJECT

FORT BRAGG, N.C. – Apr. 6, 2006 – CIBER, Inc. (NYSE: CBR) today announced that its Federal Solutions Practice has won a \$13.1 million, five-year outsourcing contract to deliver network operations, help desk, Web development, systems analysis, and project management services to the U.S. Army’s Womack Army Medical Center in Fort Bragg, N.C. Womack is outsourcing information technology processes to reduce costs and focus on its core mission of providing the highest quality healthcare to active and retired military personnel in the area.

Womack chose CIBER because it provided the best value during the open bidding process. While this is CIBER’s first military hospital IT support project, the firm has worked with the U.S. Army for many years, providing similar services to critical units such as the U.S. Army Reserve; Fort Stewart, Ga.; Fort Campbell, Ky.; Fort Rucker, Ala.; Army JAG Corp, and many Regional Support Commands.

CIBER Federal Solutions is organized to align with each branch of the military and federal civilian departments—Navy, Army, Air Force, and Civilian Agencies—to provide direct strategic focus for its clients in these areas.

Donald Brooks, Deputy Chief of Womack’s Information Management Division, said, “When you think of hospitals, you don’t necessarily think of information technology. However, IT services such as help desk, network operations, administrative support, software, and Web development are critical to our ability to provide the best possible services to our customers. CIBER has proven its skill in delivering these services effectively and efficiently, and we’re happy to have them on board.”

“We’re proud to continue helping the U.S. military with its IT needs,” said Wally Birdseye, President of CIBER’s Federal Solutions Practice. “Our dedicated focus to the Army enables us to become subject matter experts so we can understand our customers’ specific needs and provide them with superior IT services and support.”

Womack Army Medical Center serves 160,000 eligible beneficiaries within a 40-mile radius, the largest beneficiary population in the Army.
