**CIBER UNVEILS NEXT GENERATION OF STATE LABOR INFORMATION
MANAGEMENT PROGRAM**
Hosts Forum for State Labor Management Information Officials

GREENWOOD VILLAGE, Colo. – May 1, 2006 – Labor Market Information (LMI) officials from 12 states convened at CIBER, Inc. (NYSE: CBR) headquarters April 26 and 27 to review new features in CIBER’s next generation workforce information management solution. Representatives from the states of Alaska, Arizona, Arkansas, California, Hawaii, Idaho, Kentucky, Michigan, Montana, Nevada, Ohio and Washington attended this two-day event to discuss challenges in providing labor and job market data to job seekers, employers, legislators and economists.

The event is CIBER’s annual Workforce Informer Forum, where LMI agency representatives meet to describe new state agency challenges and demands, discuss experiences, and share ideas and feedback about new features in CIBER’s Workforce Informer solution. Workforce Informer is a Web-based information technology solution that enables states to manage large volumes of labor data and provide a single source of workforce information to constituents. CIBER designed Workforce Informer with the aid of these states, and continues to work with them to solicit feedback and suggestions for enhancements.

Today, Workforce Informer is the leading LMI delivery solution in the country, having been implemented in 14 states—28 percent of all U.S. states—and offering significant benefits and cost savings within the first eight to twelve months of deployment.

“Collaborating with the state LMI Managers has been very beneficial,” said Ed Burns, President of CIBER’s State and Local Government Practice. “They provide ideas for new features and suggestions for changes, which enables us to build a solution that helps them do their jobs most easily and efficiently. We’re always looking for ways to make our products better, and their input has been a great advantage for everyone.”

Forum attendees said they appreciate Workforce Informer’s speed, portability, intuitive interface, and ease of use. Attendees also stated that they value the solution’s ability to provide all information in one place, rather than on multiple spreadsheets, as was the previous process for several states. While there may always be
