CIBER REPORTS NEW CONTRACTS, ADDS TWO FACILITIES
CIBERsites® Outsourcing Practice Expanding

GREENWOOD VILLAGE, Colo. – Aug. 24, 2006 – CIBER, Inc. (NYSE: CBR) today announced the opening of two additional CIBERsites® facilities in Dallas, Texas, and Phoenix, Ariz. CIBERsites® are CIBER’s outsourcing centers which offer business and government clients information technology (IT) operations services (such as help desk and call center functions or IT hosting services) and application development and management services, both onshore and offshore. The new facilities are required as a result of significant growth in all areas of CIBERsites® business, including \$9 million in new business. Growth in CIBERsites® IT operations services has been particularly strong due to high demand for hosting and support of enterprise resource planning (ERP) systems, combined with the efforts of middle-market customers to reduce IT operating costs.

Most recently, CIBERsites® have won several large contracts:

- \$4.5 million contract to provide infrastructure outsourcing and help desk support for a \$7 billion electricity and natural gas utility based in Missouri. The project will help this client focus on its core business while reducing costs.
- \$2 million outsourcing solution for a major pharmaceutical firm. The firm will receive hosting and IT operations services for its regulated and non-regulated environments.
- \$1.5 million contract to provide mainframe application support, enhancement, and development services for the world’s largest nonpartisan membership organization. The effort will simplify the organization’s membership system and increase member services and satisfaction.
- \$1 million contract to provide IT operations hosting services to a nationwide organization of poison control centers. The project will allow the organization to focus their resources and efforts on their core mission and important task of serving the public.

CIBER now has eight CIBERsites® in operation worldwide: in Edison, N.J; Staten Island, NY; Oklahoma City, Ok.; Tampa, Fla.; two centers in Bangalore, India; and the two new sites in Dallas and Phoenix.

(MORE)

CIBER REPORTS NEW CONTRACTS, ADDS TWO FACILITIES

The Dallas facility expands the help desk and call center operations currently operated out of Edison, N.J., and serves as a backup to the Edison facility, in the event that disaster recovery services are needed. Likewise, the Edison facility serves as a backup to the Dallas facility.

The Phoenix data center expands CIBER's existing data center operations out of Edison, N.J., and Staten Island, N.Y. The addition of this data center is due to growth in the hosting and managed services area and the need to offer improved solutions to customers who desire a location in the western United States. The Phoenix facility serves as a backup to the Edison and Staten Island facilities, in the event that disaster recovery services are needed. Likewise, the Edison and Staten Island facilities serve as backups to the Phoenix facility.

To meet the demands of its customers, CIBER has signed a multi-year lease for data center space at the Sterling Network Services major data center facility in Phoenix, Ariz.

"In the increasingly competitive marketplace, businesses must focus their limited resources on their core products and services," said CIBERsites® President Tim Boehm. "Our CIBERsites® solution offers companies a way to cost-effectively accomplish critical IT initiatives without overwhelming their existing staff or taking their eye off their goals."

About CIBER, Inc.

CIBER, Inc. (NYSE: CBR) is a pure-play international system integration consultancy with superior value-priced services for both private and government sector clients. CIBER's global delivery services are offered on a project or strategic staffing basis, in both custom and enterprise resource planning (ERP) package environments, and across all technology platforms, operating systems and infrastructures. Founded in 1974 and headquartered in Greenwood Village, Colo., the company now serves client businesses from over 60 U.S. offices, 20 European offices and four offices in Asia. Operating in 18 countries, with 8,000 employees and annual revenue of nearly \$1 billion, CIBER and its IT specialists continuously build and upgrade clients' systems to "competitive advantage status." CIBER is included in the Russell 2000 Index and the S&P Small Cap 600 Index. CIBER, ALWAYS ABLE. www.ciber.com
