CIBER ENTERPRISE SOLUTIONS RANKS FIRST IN DELIVERING FINANCIAL ERP IMPLEMENTATIONS TO HEALTHCARE ORGANIZATIONS

GREENWOOD VILLAGE, Colo. – Sep. 28, 2006 – CIBER Enterprise Solutions, a division of CIBER, Inc. (NYSE: CBR) has been recognized as the leader in the Financial Implementation Principal category of the June 2006 “Top 20 KLAS Mid-Year Report Card,” issued by KLAS Enterprises, LLC. Based in Orem, Utah, KLAS is an independent firm that monitors and measures the delivery of information technology to healthcare organizations.

A top ranking in the Financial Implementation Principal category means that providers rate CIBER highly in implementation and service metrics for their financial ERP projects. KLAS solicits the active participation of healthcare organizations in evaluating vendors, and reports these evaluations in annual rankings and semi-annual reports.

This is the first year CIBER participated in the evaluation.

“We are very pleased with CIBER’s number one position in the results of the Top 20 report. The findings validate what we have worked hard to achieve—the ability to provide the most comprehensive and effective ERP support for the healthcare industry,” said Russ Wheeler, President of CIBER Enterprise Solutions. “While the KLAS report emphasizes our current success in assisting healthcare organizations, it also inspires us to continue to provide the best in information technology support to streamline business processes and support healthcare’s business and customer care models. We are especially honored by the results given that this is CIBER’s first year in the KLAS study.”

CIBER received a total score of 85.1 out of a possible 100 points.

In another KLAS report, “Clinical and Financial ERP Implementation,” CIBER led in ten of the 12 performance indicators, which were used to evaluate the six most recognized and prominent healthcare support organizations:

- Lived up to expectations
- Real problem resolution
- Money’s worth

(MORE)

CIBER ENTERPRISE SOLUTIONS RANKS FIRST IN DELIVERING FINANCIAL ERP IMPLEMENTATIONS TO HEALTHCARE ORGANIZATIONS

- Worth the effort
- Services delivered as promoted
- Service delivery on time
- Services delivered within budget/cost
- Quality of services staff
- Help your job performance
- Overall satisfaction

The two categories in which CIBER did not lead—“Executives interested in you” and “Contracting experience”—CIBER was tied for second and came in third, respectively.

The objective of the KLAS reports is to help healthcare providers identify the professional services firms that best meet their IT needs. The research uses 19 questions to rate the overall performance of the professional services delivered and includes 12 performance measures. The Financial Implementation Principal category is just one for which Top 20 rankings are provided. Other categories include, but aren't limited to, Decision Support – Business, Surgery Management, Cardiology Reporting and Documentation, and Emergency Department Systems. CIBER was not included in the study in these additional categories.

“KLAS is always pleased when firms deliver on their promises to providers. We congratulate CIBER on their recent top Financial ERP ranking in KLAS' Clinical/Financial ERP report,” said Michael Smith, Research Director, Professional Services, KLAS Enterprises.

CIBER provides strategic and implementation services for healthcare organizations by assisting clients with reducing costs, ensuring operational efficiencies, streamlining client business processes, enhancing reporting and automation, and helping clients upgrade their IT systems.

CIBER has assisted with the implementation and upgrade of ERP packaged software with several hundred healthcare clients and continues to attract new clients in this sector.

About KLAS Enterprises, LLC

KLAS helps healthcare providers make informed technology decisions by offering accurate, honest, impartial vendor performance information. KLAS independently monitors vendor performance through the active participation of thousands of healthcare organizations. KLAS uses a stringent methodology to ensure all data and ratings are accurate, honest and impartial. Research results are offered to healthcare providers through: 1) A free directory of vendor and product information, 2) Free online access to vendor ratings for participating providers, and 3) In-depth published reports. www.healthcomputing.com KLAS Confidential Information. © 2006 KLAS Enterprises LLC.
