**CIBER IMPLEMENTS THE ORACLE E-BUSINESS SUITE
FOR UNIVERSITY OF TEXAS – PAN AMERICAN**

EDINBURG, Texas – Oct. 25, 2006 – CIBER Enterprise Solutions, a division of CIBER, Inc. (NYSE: CBR), today announced it has successfully completed the implementation of the Oracle® E-Business Suite for the University of Texas – Pan American (UTPA). The project, dubbed “Oracle 24/7,” will provide UTPA faculty, staff and students with secure, round-the-clock online access to their personal data. It will also increase access to support services—such as changing payroll tax withholding amounts, changing addresses, updating or changing benefits, and viewing time-off balances—without putting additional demands on administrative staff.

CIBER is exhibiting at Oracle OpenWorld this year in booth #2112. Learn more online about CIBER at www.ciber.com/events/openworld.

The project involved implementing Oracle Human Resources Management System and Oracle Financials, both part of the Oracle E-Business Suite, and customizing it for UTPA’s specific requirements. In autumn of 2004, UTPA decided to change vendors to lead the project. Based on an extensive selection process and CIO Bob Lim’s previous experience with CIBER’s capabilities, the University selected CIBER to take over the initiative.

“I had worked with CIBER on IT projects before when I was with the Academy of Art University in San Francisco,” said Bob Lim, Chief Information Officer at UTPA. “At AAU, CIBER helped us successfully implement Oracle’s PeopleSoft Enterprise Human Capital Management, PeopleSoft Financial Management, and PeopleSoft Enterprise Student Administration solutions, which are part of the PeopleSoft Enterprise Campus Solutions family. We were quite pleased with the results. CIBER is unique in that they are not tied to a specific vendor, and they have extensive higher education experience, so I knew they could deliver for us on our Oracle project here at UTPA.”

CIBER, a Certified Advantage Partner in Oracle PartnerNetwork, is the leader in the U.S. and Canadian Oracle/PeopleSoft higher education markets, having implemented Oracle/PeopleSoft at more than 150 institutions in the United States and Canada. Approximately 25 percent of Oracle/PeopleSoft higher education

customers have worked with CIBER to implement and/or upgrade their software, most recently at the University of Alberta. CIBER has also assisted higher education clients in Mexico and South Africa, and won Oracle's 2005 UK Partner Innovation Award for implementations at the Universities of Cambridge, Manchester, and Derby in the United Kingdom.

"CIBER's strength is in our dedicated higher education practice and knowledge of all major ERP packages," said Mike Dillon, Senior Vice President of CIBER Enterprise Solutions' Higher Education Practice. "Our understanding of the goals, challenges, and requirements of higher education institutions cuts across all technologies, and helps us build a solution that best meets each client's specific needs. By helping UTPA provide enhanced services and maintain efficient operations for its students, faculty, and staff, we help the University meet its goals of providing a stimulating education environment for its students."

UTPA, based in Edinburg, Texas, is the tenth largest university in Texas and the fifth largest in the University of Texas system. It offers 56 bachelors degree programs, 46 masters degree programs, and two doctoral programs, and is second in the nation in the number of bachelors degrees awarded to Hispanic students.

About Oracle PartnerNetwork

Oracle PartnerNetwork is a global business network of 17,700 companies who deliver innovative software solutions based on Oracle software.
