CIBER AND PENNSYLVANIA TURNPIKE COMMISSION COMPLETE THIRD AND FINAL PHASE OF \$58 MILLION IT PROJECT ON TIME AND ON BUDGET

HARRISBURG, Penn. – June 11, 2008 – CIBER, Inc. (NYSE: CBR), in partnership with the Pennsylvania Turnpike Commission (PTC), has successfully completed the third and final phase of a three-phase implementation of an SAP® ERP application – on time and on budget – for PTC. The \$58 million project, which was awarded to CIBER in May 2006, was undertaken to transform PTC’s information technology (IT) systems into a single, integrated, and state-of-the-art system to increase its ability to plan, conduct business, and react more efficiently to the needs of its customers.

“PTC is truly an innovation leader, within and beyond the public sector,” said Patrick Bakey, President, SAP Public Services, Inc., based in Washington D.C. “Clearly, the collaboration between SAP, PTC and CIBER was essential in deploying this project on time and on budget to demonstrate how innovation and technology can efficiently deliver high-quality services to PTC’s constituents.”

PTC’s prior IT system comprised multiple disparate computing systems which relied on outdated technology and which operated as stand-alone systems, essentially separating important pieces of historical and operational data across many platforms, and making trend analysis and decision-making difficult and time-consuming.

With the completion of this project, nicknamed PRIDE (PTC Readiness for an Integrated Decision-making Enterprise), PTC will benefit from streamlined and standardized administrative and financial processes; expanded financial reporting and analysis capabilities; elimination of multiple, disparate information systems; elimination of redundant activities; centralized operational and historical data for trend analysis; and integration of secure internet technology to provide data access to employees, retirees, and fiduciaries.

“We are pleased to have achieved the integration of our systems we envisioned more than two years ago,” said George Hatalowich, PTC’s Chief Operating Officer. “We are beginning to see the business process improvements that the SAP applications and inherent business best practices have allowed us to take advantage of, and we recognize that our business efficiencies will be realized over many years to come. We appreciate all

of the hard work that has gone into making this project a success, especially the leadership CIBER has committed throughout the project.”

For all phases of the PRIDE project, CIBER—an SAP services partner for SAP Public Services, Inc. accounts—has served as the prime contractor. The first phase was completed 30 days ahead of schedule in February 2007. The second phase was completed in December 2007, also on time and on budget.

For this third and final phase, CIBER has integrated the business functions of the SAP ERP Financials solution, materials management, SAP Supplier Relationship Management (SAP SRM), plant maintenance, project systems, electronic document management and business intelligence applications.

“Teamwork has been the key to the success of the PRIDE Project,” said Jeff Mesaric, PTC Chief Information Officer. “CIBER and PTC project team members consistently overcame the challenges that were before them to enable a successful go live for finance and logistics. With finance and logistics now in production along with our previously implemented human capital management and payroll functionality, PTC now has the fully integrated system that we have been anticipating.”

“A great deal of work has been completed by PTC and CIBER over the last two years. This could not have been accomplished without both parties being focused on one goal of an integrated system. With this project launch, the goal has been achieved,” said Dave Siebert, Senior Vice President of CIBER’s Enterprise Solutions Division.

PTC employs approximately 2,300 people and earns \$580 million annually in toll revenue. It operates a critical transportation route, which accommodates more than 500,000 vehicles per day, and includes 537 miles of turnpike, 59 fare collection facilities, 21 maintenance facilities, five twin tunnels, ten State Police barracks, 19 service plazas, and two traveler information centers.

About CIBER, Inc.

CIBER, Inc. (NYSE: CBR) is a pure-play international system integration consultancy with superior value-priced services and reliable delivery for both private and government sector clients. CIBER’s services are offered globally on a project- or strategic-staffing basis, in both custom and enterprise resource planning (ERP) package environments, and across all technology platforms, operating systems and infrastructures. Founded in 1974 and headquartered in Greenwood Village, Colo., CIBER now serves client businesses from over 60 U.S. offices, 25 European offices and seven offices in Asia/Pacific. Operating in 18 countries, with more than 8,500 employees and annual revenue of approximately \$1.2 billion, CIBER and its IT specialists continuously build and upgrade clients’ systems to “competitive advantage status.” CIBER is included in the Russell 2000 Index and the S&P Small Cap 600 Index.
