**CIBERSecure ENABLES COORDINATED SECURITY RESPONSE FOR
COMMAND AND CONTROL CENTERS**

GREENWOOD VILLAGE, Colo. – Nov. 3, 2008 – CIBER, Inc. (NYSE: CBR) today announced its latest physical security service offering, CIBERSecure, a new solution for effective and comprehensive situational awareness, security event management and data integration.

CIBERSecure is a command and control solution that combines security technologies, sensor data, video data, operational applications, crisis management, first responder systems, and networks communication systems together to apply agency response policies and best practices for complete real-time situational awareness and response. Single command centers, multi-agency centers and regional centers will realize the benefits of improved incident response communication and management through CIBERSecure.

“We are excited to introduce CIBERSecure. CIBER is now in a position to offer our clients a level of security integration that is unmatched in the industry,” said Erin Phelps, Director of Enterprise Security Solutions for CIBER. “As a leading IT Services Security solutions provider, we do not sell shrink-wrapped, one-size-fits-all command center applications. We work with our clients to understand the unique needs and system expectations and then tailor CIBERSecure to meet those needs.”

CIBERSecure builds on CIBER's success implementing integrated infrastructure security systems at some of the largest ports in the U.S. where integration of multiple levels of public sector and private sector information is necessary to ensure full transparency and visibility to all potential threats.

CIBERSECURE ENABLES COORDINATED SECURITY RESPONSE FOR COMMAND AND CONTROL CENTERS

Industry reaction has been positive. “This solution creates new potential for addressing a very technically challenging issue that IT and Security directors face today in trying to bring more-and-more system and data together in an attempt to prepare, prevent, respond, and recover to incidents,” said David Hedges, president of Valor Concepts (<http://www.valorconcepts.com>), a leading security consulting and engineering company.

About CIBER, Inc.

CIBER, Inc. (NYSE: CBR) is a pure-play international system integration consultancy with superior value-priced services and reliable delivery for both private and government sector clients. CIBER’s services are offered globally on a project- or strategic-staffing basis, in both custom and enterprise resource planning (ERP) package environments, and across all technology platforms, operating systems and infrastructures.
