CIBER SELECTED BY GENERAL MOLY TO PROVIDE SAP® IMPLEMENTATION

Greenwood Village, Colo. – Nov. 11, 2008 – CIBER, Inc. (NYSE: CBR) today announced it has signed a contract with General Moly and has commenced an Enterprise Resource Planning (ERP) implementation for General Moly’s entire operation. CIBER’s partnership with SAP® and expertise in IT services were the major decision factors in why General Moly chose CIBER for the project.

General Moly and CIBER have begun the first phase of a multi-phase project. Utilizing a packaged rapid implementation solution for the mining industry, based on SAP’s Mining Solution, the project will focus on core financials, plant maintenance, materials management, human capital management and environmental health and safety elements. Phase two of the project will focus on sales and distribution, production planning and execution, and will continue to build on the functionality instituted in the first phase.

“We are excited that General Moly has selected CIBER to be the single source provider for their SAP implementation needs,” said Peter Lloyd, Senior Vice President of CIBER’s SAP practice. “In addition, our extensive experience deploying ERP solutions for the mining industry has allowed CIBER to become a trusted advisor and sole-source provider for General Moly.”

General Moly’s primary projects include the Mt. Hope project located in central Nevada, considered one of the world’s largest and highest grade molybdenum deposits, and the Liberty Project (*Hall-Tonopah*) which is also located in central Nevada. The company seeks to become the largest primary molybdenum producer by the middle of the next decade.

“Partnering with CIBER will allow us to focus on developing the Mt. Hope project, and leave the management of our SAP implementation with a fully qualified implementation partner,” said Lee Shumway, Director of Business Processes and Information Technology for General Moly. “Their extensive experience with the SAP Mining solution made them a natural choice to partner with for our operations.”
