**CIBER COMPLETES COMMERCIAL SOFTWARE REDESIGN;
*AWARDED NEW CONTRACT FROM TELETRACKING TECHNOLOGIES***

PITTSBURGH, Penn. – **August 7, 2009** - CIBER, Inc. (NYSE:CBR) announced the completion of a 4-year, multi-million dollar re-architecture and redevelopment project with TeleTracking Technologies, Inc. CIBER has also been awarded a new contract to assist with the design and development of new products for TeleTracking Technologies' Patient Flow 2.0 rollout.

TeleTracking Technologies, Inc. is a world leader in patient flow automation solutions and continues to lead the industry with thought leadership and world class software solutions and patient flow redesign services. The general release of the Bed Management Suite™ powered by TeleTracking XT™ joins TransportTracking™ which has been live on the TeleTracking XT™ platform since 2007 at more than 100 hospitals, to create the industry's most comprehensive patient flow automation software package, Capacity Management Suite powered by TeleTracking XT™.

“TeleTracking Technologies is thrilled with the success of the Capacity Management Suite powered by TeleTracking XT™. Engaging with CIBER on this project resulted in the successful completion of a much anticipated version and upgrade of our suite of applications. CIBER's breadth of knowledge and experience was an indispensable complement to our capabilities,” said Don DeCorte, Senior Vice President and Chief Technology Officer.

CIBER provided assistance with Engagement and Project Management, Functional Design, Architecture Design and Development throughout the entire project. The application's enhancements include visual alerts and timers to improve the monitoring and management of patient admission criteria, isolation indicators to help minimize cross contamination during transfers and easily

configurable screens to help staff organize the information they need. This application offers a single platform that allows for multi campus deployment and centralized placement capabilities.

The new version of the Bed Management Suite™ powered by TeleTracking XT™ is already running in several leading hospitals. The application has received extremely favorable reviews from those already using it.

“CIBER is very pleased with the completion of the Capacity Management Suite. We are very proud to have worked on this project with TeleTracking Technologies and are confident this application will give hospital staff the information they need to best serve their patients, especially given the current operational challenges hospitals are experiencing and the uncertainty related to the national debate concerning healthcare,” said Christine Locklin, Vice President and Area Director for CIBER in Pittsburgh.

Since 1991, TeleTracking Technologies, Inc. fundamentally changed the way hospitals manage their patient throughput challenges with proven patient flow automation. The world leader in patient flow automation solutions with nearly 800 hospitals clients throughout the United States, Canada and the United Kingdom, TeleTracking has been recognized by leading healthcare software research firm, KLAS, for the last two years as “Category Leader – Bed Management”. TeleTracking continues to lead the industry with thought-leadership and world class software solutions and patient flow redesign services.
