**CIBER COMPLETES DATABASE AND REPORTING SYSTEM FOR
THE INVESTMENT FUND FOR FOUNDATIONS (TIFF)**

CONSHOHOCKEN, Penn. – November 9, 2009 – CIBER, Inc. (NYSE:CBR) announced the successful implementation of a completely customized database and reporting system for The Investment Fund for Foundations (TIFF). TIFF engaged CIBER to build a system to its specific needs to better serve its customer base and comply with newly established reporting requirements.

Founded in 1991, TIFF seeks to improve the investment returns of eligible organizations by providing a series of multi-manager investment vehicles and resources aimed at enhancing fiduciaries' knowledge of investing. TIFF partnered with CIBER to replace its outdated, spreadsheet-based system and CIBER created a customized database and reporting system that reduces risk and ensures accountability requirements are met. The \$900,000 project was completed on-time and on-budget.

"The database and reporting system CIBER created has significantly reduced the man hours necessary to input, report and track data. This web-based application system has streamlined our business processes and provided us with the custom reports that enhance the speed and accuracy of our decision making processes. CIBER did a great job in every aspect of the project, being very flexible in supporting TIFF's project needs," said Jim Shields, Chief Information Officer of The Investment Fund for Foundations.

"CIBER is pleased with the completion of TIFF's customized database and reporting system. This state-of-the-art system ensures high data quality, data security and data integrity while providing the key financial reports needed to serve clients in an efficient manner," said John Morrissey, Vice President and Area Director for CIBER in Philadelphia.
