

Mobile Data Collection

The Value of Mobile Information

To make the right decisions, every business depends on timely and accurate data. However, many organizations still use error-prone manual methods to enter, access, and manipulate data which can result in inaccurate and incomplete information. To resolve these issues, many manufacturing, distribution, retail, and field services operations apply mobile solutions to drive more timely and accurate information into their enterprise systems.

Ciber's Mobile Data Collection solutions are focused on making improvements for the modern decentralized workforce by helping to reduce costs, improve customer satisfaction, reduce process cycle time and improve the data timeliness and quality so that businesses are making decisions on real-time data.

Integrated Turnkey Applications

As a single source for integrated software and hardware, our custom application development expertise, combined with our dedicated practices in leading ERP solutions like SAP, Oracle and Infor software help us create turnkey integrated applications that are cost-effective and lead to a rapid return on your investment.

We utilize the latest technologies such as tablet computing, GPS, imaging, RFID and Voice to ensure the highest quality data is utilized in your mobile business solutions. In addition, as the leading reseller of enterprise mobile devices, tablets, wireless, software, and printers, we deploy mobile computing hardware that we know are rugged and dependable in a variety of operating environments.

Ciber has experience providing applications for Field Service and Rounds, Maintenance, Quality & Inspection, Delivery & Route Accounting, Enterprise Asset Management, and Inventory & Warehouse Management in the following industries:

- Distribution and Logistics
- Retail

- Oil, Gas, and Utilities
- Life Sciences
- Manufacturing
- Public Sector

Efficient, Scalable and Extensible Solutions

Ciber's flexible implementation services assist customers with development of an initial business case and mobile strategy through full deployment and production support. Utilizing 20+ years of experience in designing, developing, and deploying mobility projects, we guide customers through device selection based on a number of factors, including durability, battery life, data collection requirements, capacity, and expandability.

We work with customers to ensure that management of field deployed devices follow a methodical process that is as secure as the rest of your corporate IT systems and developed for efficiency, scalability, and extensibility. Ciber has targeted solutions in the following areas:

SAP – Ciber can help you seamlessly integrate your SAP Inventory Manager (IM), Work Manager (WM), Plant Maintenance (PM) and Service Management (SM) applications with SAP Mobile Platform and ITS Mobile.

Lawson – Our expertise includes Lawson's Mobile Supply Chain Management module and Lawson's M3 Warehouse Mobility application suite.

Oracle – Ciber implements mobile solutions for Oracle E-Business Suite, JD Edwards, and PeopleSoft. Our turnkey implementation solutions for Oracle eAM include asset tracking, inventory and supply chain. Our JD Edwards Web Enabled Mobile Solution provides real-time data access, without the added complexity of middleware.

Supply Chain – Ciber has extensive experience in implementation of wireless solutions for warehouse management and transportation applications.

We help clients design, implement, and integrate focused mobility applications, with a proven implementation methodology that controls costs, meets project deadlines, and minimizes risk. By partnering with leading technology providers, our clients extend the reach of their Enterprise Systems by enabling mobile workers through integrated hardware and software solutions that increase the efficiency, accuracy, and visibility of business process.
