

# Lean Agile Adoption Strategies

Cut project times by more than 50% and slash project costs by 40%

## Implement a Lean Agile DevOps program

Every organization is at a different agile development maturity level. Some are just starting out while others are well along the way. Some have tried to adopt an agile transformation approach and have failed. Most organizations are challenged to meet business needs fast enough, and to do so cost effectively. What they want are business results that are predictably delivered by high-performance teams using Agile and DevOps best practices.

Improve Agile practices with a Lean approach

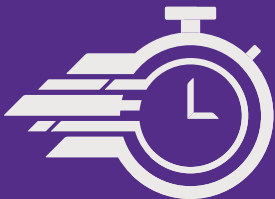

Eliminate the high cost of software delivery delays

Increase application release frequency 2X to 12X

Modernize continuously

Leverage the cloud

## Lean Agile teams deliver high-impact results

Cut projects times by

**50+%**

Slash project costs by

**40+%**

Increase production release quality up to

**50%**

with reductions in severity 1 and 2 defects

## Ciber Recommends:

Combine Agile methods with Lean concepts and DevOps processes.

Integrate business and IT subject matter experts with product and Agile teams.

Work with Ciber to accelerate application development cycles with team and role-based training.

## Lean Agile Services:

### Team and Coach Assessments

Consistency across teams and coaches plague most companies, even those with established digital transformation programs. Evaluate inconsistencies and identify practical action plans.

### Agile Team Immersion Training

An immersive learning program that turns traditional delivery teams into agile delivery teams, by reinforcing processes, behaviors and ceremonies of high-performing Lean Agile teams.

## Lean Agile Services

### Legacy team with many specialized roles

### Agile team with cross functional developers

## Partner with Ciber to drive Lean Agile Transformation

Ciber utilizes Lean Agile methodologies to deliver business value to clients. As change agents, Ciber's Agile experts move transformation forward and help organizations to reach their full potential by embracing Lean Agile adoption best practices, Agile values and Lean thinking.
