

# Lean Agile Services

## summary brief

Expertise to help you progress on your Agile journey

### Common challenges to transformation and Innovation

- Most companies are implementing some form of Digital Transformation. Digital Transformations compel Agile Transformation
- Time-to-Market speed is in days or weeks with quality and security, and must be across customer digital experiences
- When innovating new ideas, use rapid prototyping before committing to the big spend is critical
- Spotty Agile implementations with stops & starts and disappointing results

### Truly Agile organizations create powerful outcomes

- IT becomes a change enabler of processes, technologies, and information that deliver at the speed of business
- Business experts work directly and continuously with their IT product teams
- Continuous improvements and innovations of processes, technologies and collaboration
- DevOps methods, tools and practices are applied across teams, even within legacy application teams, reducing latency and optimizing throughput
